

**The City of Edinburgh Council (Traffic Regulation; Restrictions on Waiting, Loading and Unloading, and Parking Places) (Variation No \_) Order 202\_ - TRO/21/25**

The Communal Bin Review (CBR) project involves the redesign of the existing waste and recycling communal bin services that the Council provides to ca. 60,000 multi-occupancy and flatted properties.

The project is aiming to:

- increase and improve recycling services to residents in multi-occupancy and flatted properties providing integrated waste and recycling services,
- improve overall recycling performance
- review the existing bin locations to develop more formalised collection hubs to improve the perception of the service and enhance the streetscape
- improve waste and recycling service reliability
- ensure the service reflects changes to legislation and policies within and outwith the Council.

To implement the Communal Bin Review aims it is proposed to re-locate on-street communal waste and recycling bins into more formalised new hubs which will require changes to the existing layout of parking places and other road-related restrictions.
